

## Thank you for you for contacting Rainbow Treecare to protect your trees from Japanese beetle damage!

We are happy to offer a quick response plan to protect your plants that are most susceptible to feeding by Japanese Beetles. Before you accept our offer, please take the time to read the information about this service below to decide if it is right for your property:

**SERVICE:** This service is provided as a one-time, quick response to Japanese beetle feeding for new Rainbow Treecare customers. Once accepted, Rainbow Treecare will have a technician out to spray any eligible plants on the property within three business days. After the spray is complete, one of our Consulting Arborists will visit your property to make future recommendations for proactive protection of your plants and trees next season.

**PRODUCT:** This service utilizes a foliar spray using a product called Acelepryn (Active ingredient chlorantraniliprole, EPA Reg. No. 100-1489) to protect your trees and shrubs. We use this product because of its reduced impact to pollinating insects that visit many of the trees and shrubs Japanese beetles feed on. Acelepryn provides approximately 28 days of control for feeding adult Japanese Beetles, and additional services may be required for complete protection. Acelepryn does not act as a repellent against Japanese beetles. The beetles must ingest the foliage for the product to work, so you will still see some damage to the leaves.

**ELIGIBLE PLANTS:** The following trees and shrubs are eligible for treatment through this service: Linden, Birch, Crabapple, Elm (under 35 feet), Grapevines (non-fruiting), Roses, Cotoneaster, Viburnum, Weigela. Please note that our equipment can spray approximately 30-35 feet up in the air in ideal conditions. Any foliage above this will not be able to be sprayed. Rainbow Treecare is not able to spray raspberries, apple trees, or other woody plants that produce crops for human consumption.

**PRICING:** The price for this service is \$299 plus tax for lot sizes up to 25,000 square feet. \$20 will be charged for every 5,000 square feet in addition to the 25,000.

**DISCLAIMER:** By agreeing to this service, you are agreeing to all of the information above as it pertains to the service, product, eligible plants, and pricing. Please reference the above information and fact sheet that were provided to you prior to accepting this service. If you have any questions about this service please call 952-922-3810 for more information.

I have read the above terms and conditions for Japanese Beetle Service
