Professional Tree Pruning

What To Expect from Rainbow's Professional Tree Pruning Services.

Our Expertise

Trained And Certified
Your arborist's recommendations will be followed by pruning specialists who have been specially trained and certified. Our crews cut the right branches in the right places, using the right technique and equipment, which means you never have to worry about the dangers of incorrect pruning.

The Right Equipment For The Job
By breaking your tree's natural protective barrier, climbing spikes make it easier for insects and disease to attack. We never use them! Instead we use ropes and specialized equipment to minimize impact and protect your tree.

The Right Time For Your Tree
Services are completed when it's safe for the tree, depending on the species. Pruning at the wrong time of year can cause stress, and increase the risk for disease.

Gentle On Landscapes
You spend time and money to care for your lawn and landscape plants so they look their best. Our crews will do our best to protect your entire landscape so it stays looking beautiful.

Our Professional Service

Careful With Debris
We work around homes every day and use custom equipment to keep you and your home safe from falling limbs and branches.

Neat And Tidy
Rainbow crews clean up branches, sticks and twigs and debris completely. If we prune when there is snow on the ground, we'll pick up as much as we can and be back with rakes in the spring.

Easy For You
Rainbow takes care of any additional scheduling, from power lines, to telephones, to notifying neighbors. You won't have to do a thing.

Full Service
Rainbow provides a full range of professional tree pruning services. Ask us to help you with:

Structural Pruning – the best thing to help young trees grow strong and true

Deadwood Pruning – removal of dead, diseased, or dying limbs and branches

Livewood Pruning – improves clearance or removes limbs that may be dangerous to people or propertyinactive, eliminating any concerns of pests and disease transmission.
