

# Tree Planting

Strong roots in the ground create strong bonds in the community. Properly planting trees benefits our cities for generations to come. The most critical stage in an urban tree's life is at its planting. Rainbow's revolutionary planting process places roots right where they need to be, starting your tree in the best position to thrive.

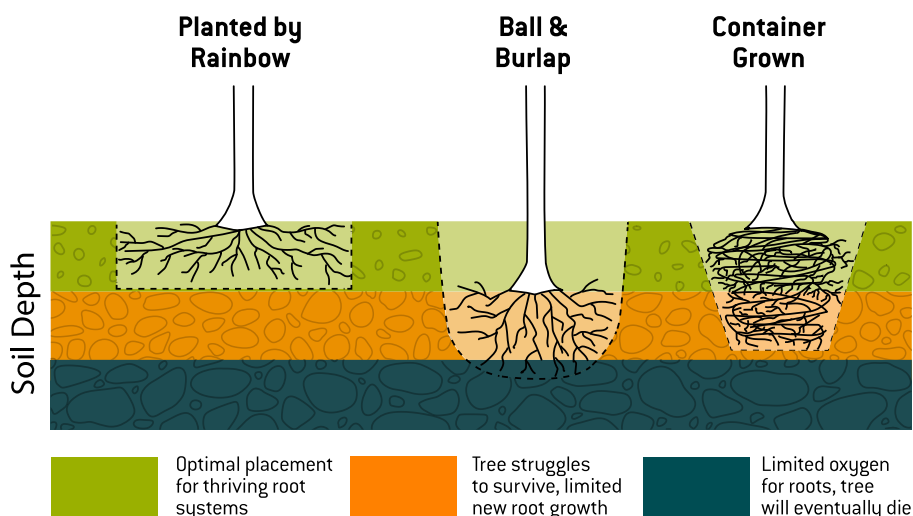

## Our Planting Method

## Roots Need to Breathe

Tree roots require oxygen for growth. The deeper the tree is planted the less oxygen there is so roots grow poorly.

Rainbow's unique planting method places the tree roots for optimal growth, avoiding the common pitfalls of other growing and planting practices.

## A Better Approach

Trees planted by Rainbow benefit from innovative methods that mimic their natural forest environment, making it a superior approach to traditional planting techniques. This leads to:

- Stronger, healthier root systems planted fully intact
- Optimal planting depth allowing roots to take hold quicker
- Quicker tree establishment and above-average growth in the first year

## How Big are the Trees?

Our trees will vary in size at planting time. We aim to deliver trees roughly 8-12 feet tall, depending on the species. The root systems of these trees are 100% intact because they are not subject to heavy losses from standard materials and planting practices. The result is immediate establishment and growth.

After five years in the ground, your new trees should be well established and noticeably healthier and larger compared to those planted with conventional nursery stock.

## Maintenance & Warranty

A one-year limited warranty is included with all trees planted by Rainbow. If a tree dies within 12 months from installation, Rainbow will remove and replace the tree at no additional cost, provided the tree has received basic care and is not disqualified for other issues (see Tree Replacement Warranty for details).

Trees are an investment in the future. Protect that investment with an Establishment Package from Rainbow to support long-term success. Our Establishment Packages provide the soil care, pruning, and other crucial services your tree needs to not just get started, but to thrive.

Trees with an added Establishment Package receive a five-year, full replacement warranty. See the Tree Establishment fact sheet for full program information.
